<p>I have lived here since 1971 @ that time 6 vehicles used this back road , which by nature of size & the fact it is a dead end, means you either drive in & reverse out or vice versa. occupiers of no 403 have tended to only park the second car down their drive for obvious reasons,either parking on the road close to their garage or in it. There are now 9 vehicles using this road plus delivery & bin wagons. I used to use my garage for my everyday transport but due to the width of current vehicles I can no longer maneuver into my garage so I have no alternative than to park against my fence & reverse out, this is a blind exit & has to be negotiated with extreme care especially at school times when parents just abandon their cars to pick up their children, this then makes access from & to the main road very dangerous.</p> <p>secondly the water pressure to the houses on the back is low current owners have tried to rectify it to no avail, also the drains have gone through periods of blocking, adding to them could cause further trouble to the 100 years old system. Then there's the 6 cars on the development off the access road that I haven;t mentioned! So although there may be room to build the house without garaging or play area around it ,it will not help the existing residents one bit.</p>
