

DELIVERY & WASTE MANAGEMENT PLAN

43 Commercial St, Batley, WF17 5EP

COU of Ground Floor from Class E salon to Class E(b) Restaurant; installation of rear external.

The purpose of this statement is to provide supporting information describing how servicing will take place and operate in an acceptable manner.

Delivery vehicle;

The anticipated vehicle to be used for deliveries will be a standard Ford Transit (7.5t).

Vehicle parking location and Delivery Point to Restaurant;

All deliveries will be made via Wards Hill which is to the rear of the site. The rear contains the access directly into the storage and kitchen area and is accessed via an alley way which can also be utilised. The anticipated delivery days & times will be - Tuesday, Thursday & Saturday approximately time 9:30-10am and last between 30-45mins.

Waste Collection;

All waste will be stored to the rear of the site which is secured via a gated entrance. This will store all waste generated by the business operation and have an independent oil drum to for collection. All waste will be collected three times a week if required. No bags and/ or storage will remain in the open in the interest of vermin control and hygiene. An independent company (Quattro) will be brought on board for the collection of used oil. This is a private company who pay for used oil which in return is recycled and converted to fuel.

Behaviour of personnel during servicing;

Responsibilities for minimising noise disturbing neighbours is everybody's responsibility from drivers, who deliver goods, through to the staff who receive deliveries. Strict procedures will be in place to safely receive goods and dispose of waste. Even though the area contains commercial premises, no bottles will be binned within the early hours of the morning or late at night in the interest of any potential noise pollution. The area where the bins are stored will be maintained and cleaned by staff members on a weekly basis and/or when required.

Summary;

This delivery /service management plan has been prepared to demonstrate how the restaurant can ensure that deliveries of goods and servicing can be achieved safely and with minimal disturbance to both the highway network and locals. Implementation of this plan is the responsibility of the applicant.
