I am writing to support the planning application. The garden room is in keeping with the local area and uses local materials fitting with other buildings traditional buildings around it. The building has no effect on amenities - water is from a spring and power is by solar and biomass. The building does not over look any neighbour and does not represent any loss of light. The building has no safety issues and does not represent any visual intrusion, causes no noise, no disturbance, no smell, no overshadowing or detriment to any right of way. The area surrounding has been improved by addition of trees and wild flowers and is a benefit to the natural habitat for birds, insects and animals. Birds and squirrels are now abundant in the area, previously there was no birdsong - now it is in abundance! If the planning application is refused it would be a great waste of resources and cause significant financial hardship to the Hanson family. Immediate neighbours have placed shipping containers on the land opposite and down the way to provide for their additional storage needs. It is a travesty that this is allowed whilst the lovely building in question has a question mark over it's future because of planning. To refuse the application would be a great waste of resources, not to mention ripping up the very lovely natural habitat which has been created there. We should encourage good developments like this and pass the application without further ado.
