Subject: Objection to planning application 2024/60/92310/E

Dear Mr Edward Cheseldine

I wish to object to the above planning application as it has been made with in correct detail and misleading detail stated in section 8 of the application. This relates directly to the public foot path which was illegally moved some 3 years ago and was notified to Kirklees council by myself with no action taken.

Section 8 of the design and access statement document states that the proposal is to move the pubic footpath to where it has been used for the last 14 years. This is not the case as it passed diagonally across the land to the correct location.

A car accident removed the original sign post and stile and the owners at that time moved the stile to suit while not applying for the correct approvals.

Google maps clearly shows the stile in place at the corner of the site closest to the ex huntsman inn. This is clearly a misrepresentation of information in the application. The public footpath should be maintained in the correct location.

Regards
