As I live behind where this bungalow is to be built, I do have some reservations regarding this proposal. Primarily the removal of the trees that currently run along the boundary between the properties on Ash Grove and where the bungalow is to be built. These trees are well established and add to the character of Ash Grove and the area as a whole. They offer us protection from the elements, greater security to the area and a wonderful view, the removal of the trees are something this application does not mention in both the design and access statement and climate change statement. I also feel that the application does seem to be trying to fit a square peg into a round hole, there doesn't seem to be much room for a garden, parking and the bungalow itself will be long and narrow and will stick out as it will not fit into the aesthetics of the other properties in the area.
