Dear Sir/Madam, I am writing to formally object to the planning application for an extension at 7 Haughs Green (reference number 2024/62/92371/W), specifically on the grounds that the proposed development will adversely impact my father's property The proposed extension includes plans to build over an external window of my father's property. This window is an integral part of his home, providing essential natural light and ventilation to the room it serves. The extension's construction will obstruct this window, resulting in a significant reduction in natural light for the affected room. This would not only diminish the living conditions within my father's home but also potentially affect his health and well-being. In addition to the impact on natural light, the construction over this window could compromise the structural integrity of the wall, potentially leading to further issues such as increased dampness or structural instability in the future. These concerns are compounded by the fact that the extension, as proposed, does not appear to provide sufficient consideration for the impact on neighboring properties. I respectfully request that Kirklees Council carefully review the planning application with these concerns in mind. It would be beneficial for the council to ensure that any development does not negatively impact the living conditions of neighboring residents and that all potential issues are addressed before any planning permission is granted. Thank you for considering my objection. I look forward to your response and hope that appropriate measures will be taken to address these concerns. Yours sincerely,
