Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	Mr Asad Ali
Site Address	110, The Crescent, Ravensthorpe, Dewsbury, WF13 3BA
Description of Development	Single storey rear extension

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Use energy efficient white goods
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
sourcing materials locally
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)
Designing the building footprint to avoid unnecessary use of materials
Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)
Resilience measures to include the use of water-resistant wallboards, hardwoods, plastic skirting boards, and ceramic wood-effect floor tiles, elevating plug sockets and appliances. Resistance measures to include the use of flood doors, barriers to prevent water ingress up to a minimum height of 600mm, SMART airbricks, sealants, and non-return valves (NRVs).
Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)
Water recycling & use of low water use shower, washing machine
Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)
where possible, enhancement and habitat creation
Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)
Locally source materials to reduce transport emissions
