<p>I think this is a good development opportunity. Currently the site is under-used and unkempt and this project prevents an opportunity to transform it into a productive and valuable asset for the community. This aligns with the demands for advanced diagnostics, which is rapidly increasing. It would improve the local economic, creating job opportunities. It would modernise the area by converting the untidy plot into a purpose built unit. This demonstrates a commitment to innovation and community improvement.</p>
