Hi, I'm emailing about the above planning, it's about time something was done with this land, i live directly next door to it at number 1 and the fact its taken all these years is disgusting, refusal after refusal, we've had to put up with fires onsite, gangs of teenagers hanging around there causing trouble, bricking our home, fly tipping and in turn rats. My partner has contacted the council numerous times about this land and the trees and you refuse to cut them back and tidy it up, its dangerous to him, large branches fall into our garden and the leaves and sap make it very dangerous for him.

I truly hope this time something is done as its appalling how we've been treat and how long this has been left.

Kind regards
