<p>Will attenuation tanks be used as since the stable car park was levelled off, a heavy stream of water now runs down the back of the properties known as 14 to no. 2 Timothy Lane? This only happens during heavy storms which are more frequent in recent times. This stream, which runs down the field where the horses graze, diverts into some gardens & empties into Howley Beck & does not go into the gulleys on the main highway of Timothy Lane. This is where excessive water, affecting Timothy Lane residents has always been a problem, going back decades.</p> <p>This may also be a good time to consider improved signage to reaffirm we are a 30mph speed zone, with 2 equine businesses, one at each end of the houses, 14 to 2 Timothy Lane.</p> <p>A new property won't add much to the speeding & dangerous driving conditions but it won't help either.</p>
