<p>Hi</p> <p>A 1100 litre bin has been ordered to the stables (getting delivered 5.11.24) . This will be emptied fortnightly. The waste contract is with Kirklees business waste . Proof of this can be emailed if required.</p> <p>The well rotted horse manure has been put on the land to be spread in January / February or as soon as it's frosty and the ground is hard enough for a tractor to drive on. This being a natural fertilizer - which is much better for the environment - opposed to tilling the fields with nitrogen which is harmful to the environment.</p> <p>The stables have always had lights from being built in 1990 . No one has ever made us aware of lights being left on all night.</p> <p>Please will you take the above comments in to consideration before make a decision on the application</p> <p>Kind regards</p>
