<p>There has been a large number of objections previously with several concerns again been raised since the planning application has had amendments.</p> <p>My concerns relate to the potential health hazards of the site, a nearby site on westgate. A site where asbestos has now been found beyond the boundary and even inside nearby homes. Development has not paused to fully investigate with LOCAL residents impacted. My concerns are this will again happen at this development again impacting the health of local residents (on onsite workers).</p> <p>It has been reported that your development is not viable in relation to providing the required number of affordable homes. Will you ensure these affordable homes are built following government policies? How will this be done if the overall project is not financially viable?</p> <p>In the new plans, there appears to be less proposed landscaping/planted trees. This ultimately limits the available habitat for wildlife, as well as natural water drainage of the area. Will this ultimately increase the risk of flooding in the area?</p> <p>Again I reiterate there are several issues in previous objections which have not been fully investigated.</p>
