**Subject:** Objection to planning application

**Categories:**

Application number 2024/92768

I am writing to object to above planning application.

I live next door to the proposed site, whilst we have lived here the site has been a garden/allotment.

The back lane to the site is narrow and the only access to my property if permission was granted there would be a lot of disruption getting to my property. There would be major disruption putting in services and drainage which in turn would prevent us accessing our property. The access lane was designed in the 1800s and is designed for the properties already here and not for further properties.

Getting materials to the site would be a problem and I can see myself getting blocked in frequently.

On top of that there is the issues of noise and dust while construction is taking place.

For both construction vehicles and vehicles for the proposed building would only further degrade the access road.
