<p>The planning site on providence street has a narrow road which with building machinery and heavy traffic will virtually be impossible for residents to out of the estate and as there are many older residents living there they need to be able to get on and off the estate without any hassle, lots are worried about making doctors and hospital appointments, the road providence street needs to be made much wider congestion of parked cars and building work will be impossible to cope with for lots of residents on the Laurels and providence street , I am also very concerned about the protected wild life that lives in the woodland that is proposed as building land what protection are you going to offer the wildlife they also need a home they have lived in the woodland for years , foxes, owls, bats, hedgehogs and many different species of birds eg woodpeckers , owls, jays, birds of prey and many more , this really needs to be taken into consideration.</p>
