Dear Sir or Madam

Planning Reference 2024/92779

I wish to object to the above application.

In February of this year trees and woodland on the site were removed without notice or possession of a felling licence. These trees had been there since at least 1984 to my certain knowledge.

Local residents have been able to wander freely on the ground without let or hindrance throughout the period and local wildlife has flourished. Bats and owls were common and

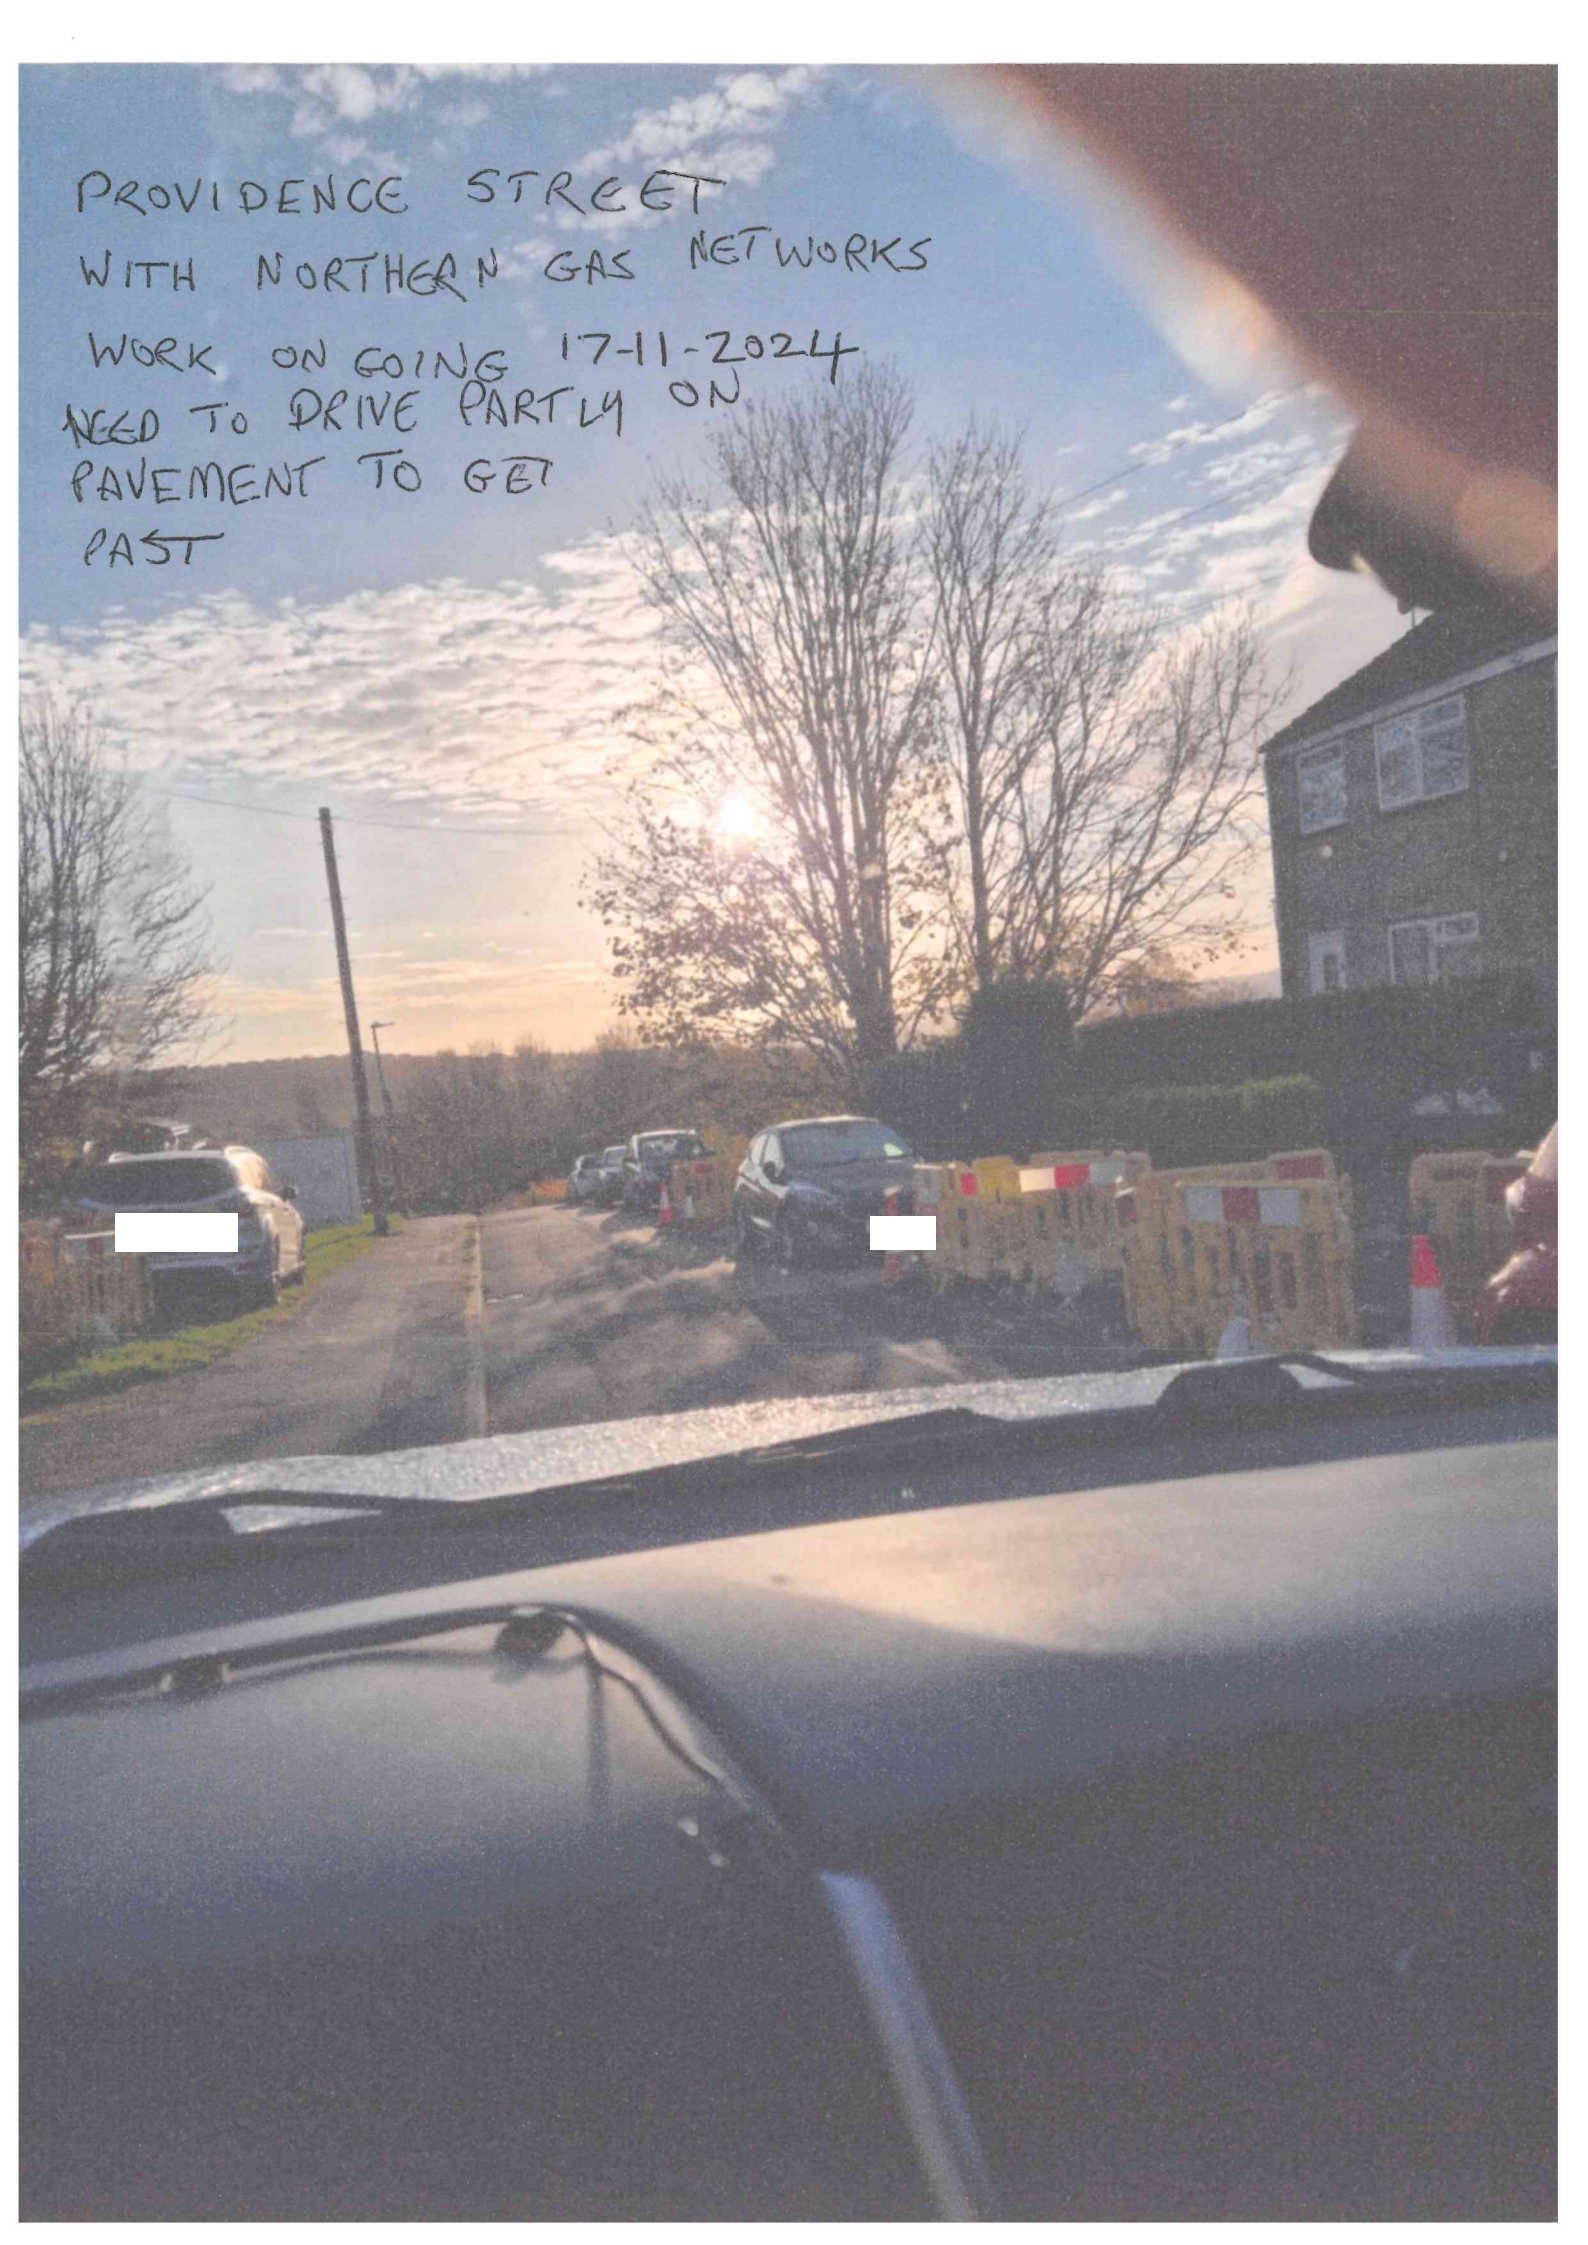

, there are certainly foxes

The suggested plan for building houses on the plot shows vehicular access via Providence Street which is not wide enough for the additional traffic, there can be problems now with traffic and parking for Providence Street, the Lannels and Syke Ing Villas. It will simply not be wide enough for extra traffic and constructors vehicles would render the cul-de-sac impassible, there is no other exit for the current residents vehicles.

The other entrance/exit to the site is shown as from Town Street through a container yard which is currently trading as a storage business

Yours faithfully
