<p>This application, in conjunction with a separate application for three additional dwellings, appears to convert a farm to a small residential development. The area is known for its farms and farm land, land which is home to rare species such as Lapwings and Skylarks, plus an important area for migrating birds and bats.</p> <p>My objections are :</p> <ul style="list-style-type: none">- Conservation of the natural environment especially loss of feeding ,roosting and nesting areas for bats and migrating birds- Effect on the character of an area which sets a precedent for future residential development-Management of existing boundaries and footpaths in an area very important to the local community as an outside space free from development.
