1. INTRODUCTION

1.1. Purpose of this Addendum Report

The purpose of this Construction Method Statement (CMS) is to address items not discussed in the original CMS document, dated February 2025.

1.2. Artificial Lighting

There will be no artificial lighting used during the enabling works nor for the purpose of site security.

1.3. Site Manager & Resident Liaison Officer

The project has not yet been resourced, we can confirm contact details for site manager and liaison officer once we are in contract and a start date has been established.

Site Manager and Resident Liaison Officer (RLO) - Remit and Responsibilities

The RLO will convey planned construction activities with residents, ensuring they are informed about upcoming work, potential disruptions and address any concerns beforehand. RLOs are therefore tasked with setting up and promoting communication channels to help create an open dialogue.

The Site Manager will ensure safety compliance, minimise disruption to residents, and adhere to regulations.

The Site Manager will deal with complaints and enquiries.

- This individual will be named at the site entrance, with a contact number.
- Any complaints will be logged on-site, fully investigated and reported to the named contact as soon as possible. The complainant will be informed as to what action has been taken.

1.4. Notable Species & Habitat

The recommendations made in both the Ecological Impact Assessment Report by Tyler Grange, dated 26th March 2021 and Arboricultural Report by AWA Tree Consultants, dated March 2021 will be complied with.

Ecological Impact Assessment found no evidence of any protected or notable species or the need for retaining any habitat features on site. We are not aware any invasive species being identified within the site.

1.5. Deliveries

We confirm deliveries will only take place between 07:30 and 18:30 Monday to Friday, and 08:00 to 13:00 on Saturdays, with no deliveries on Sundays or Bank Holidays.
