Hi guys,

Happy for the extension to the house to proceed re the dormer extension for a second floor however if they raise the garden for a street level platform we will have raised platforms/walls on both sides of the house.

This can't be avoided for 133 Headfield Road as this is the point of change from terraced houses at road level to semi detached bungalows at the adjoining terraces basement level - with ours being the first bungalow.

Having a similar situation approved at 137 Headfield Road we would be boxed in, it would reduce our light from the garden as well as view with cars parked and the raised platform too.

Thank you for taking this into consideration.
