I have studied the plans for this application and I feel that they are sympathetic to the surroundings, well thought out in terms of retaining the character of the area. Concealed car parking is acceptable and retaining the uninterrupted view up the valley from our property is welcome. Environmental factors included within the plans are laudable. A community growing project will significantly improve the area, in terms of benefits to wildlife/plant life and well being for those involved. There will be an amount of increased traffic- vehicular and human but I feel this is outweighed by the overall sympathetic nature of the proposed development.
