Subject: bath works spa lane

Good Morning all,

spa garage
spa lane
Linthaite
Huddersfield
HD75QB

11/11/2024

I am writing to you in response to a letter I got today for a planning application, no 2024/93080, I have spa garage oposit the land in question for the planning application no 2024/93080 ,approx 10 meters from my gate access,
I don't want any more access gates or traffic ,from bath works company near me,

I am objecting to the application for a number of reasons,
firstly this site has been illegal tipping of thousands of tonnes of hardcore and substance that should not have been tipped
in the first place ,such has tarmac, to infill land that was not rightfully his, and land was occupied by myself for 35 years
tipping statred 14/12/2023 and machines on site at 5am that morning,

Tree's where dug up and land drains distroyed during the excation and tipping during the site work, I have the photo's 3 meter + higher in place from the orginal ground, and no retaining wall, its a quick bogged up fly tipping job wih no consent!

This site bath works spa lane have been tipping on 3 sides for many years, and caused many a disruption to the access down spa lane,
they have extended larger gate access into spa lane to the right on the way down, making the lane narrow at that point, and I feel that enough is enough and this company bath works have out grown the site and should move on!

spa lane is far too small for such heavy traffic
I have been at spa garage since 1985 and it was quiet and peaceful , had a good access down spa lane to my work, now I am hindered with less vehicular access and turning point for my business,

The owner of bath works distributed letters to neugbours claming the land was not his, but was doing to work as tidying up for the enviroment
if that so why was there 8 wheeler tipper trucks for almost 3 weeks and a 12ft high steel fenc put up??

Please give me a response
