

## **Appendix A – Climate Change Statement**

### **Climate Change Statement for Planning Applications**

#### **Part 1: Applicant details**

Name of applicant/agent	<i>Mr John Massey</i>
Site Address	<i>Thorncliffe WM Social Club. 11 Thorncliffe Kirkburton Huddersfield HD8 0UG</i>
Description of Development	<i>Single storey rear extension</i>

#### **Part 2: Climate Change Mitigation measures**

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
<i>The extension will be built to part L standards. In this instance due to the small scale nature of the works it is not feasible to do any upgrades beyond these standards.</i>
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
<i>Use of local builders merchants to limit deliveries</i>

**Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)**

*In this instance due to the small scale nature of the works it is not feasible to add any low carbon energy sources.*

**Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)**

*A new window and glazed door to the South Elevation (on the extension) will maximise solar gain through natural sources*

**Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)**

*The works are small scale with impermeable area replaced with roof so overall effect is nett zero effect on flooding*

**Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)**

*Where possible all water fittings will be WRAS approved with low volume flush / water saving features*

**Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)**

*See separate report - none proposed*

**Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)**

*Good building practices to be followed*
