We live at the adjoining premises, we are very concerned that the bat refuge is proposed to be positioned next to our bedroom window. Bats are known to carry disease, the refuges will accumulate droppings which attract other insects, it is also known that their disease can cause lung diseases in humans, additionally the odour and noise would also be unacceptable. Why is the bat refuge required in an area which is not known for bats? We would strongly oppose its current proposed position if this was to go ahead, we have no issues with other elements of the application.
