<p>As in application number 2023/93348, but ammended on 2024/90951, the side extension is far too close to our boundary. This will require access to our land during building and in future when any maintainance is required to the roof or gutters. The building of the foundation is likely to interfere with our fence foundations, could encroach onto our land and would inhibit maintainance and/or replacement of our fence at some future date.</p> <p>The side extension guttering would be below the top of our fence and the front end of it would be hard up against the fence which is not a practical situation. We consider that the extension should be a minimum of 1/2 metres away from our boundary.</p>
