The building change will effect the environment for the numerous bats,owls,deer and that inhabit the wood to the rear of the property. The access to the house is a single track road, the narrowest passing place is one car width wide adjacent to Grade One Listed building. The proposal is at the end of a country lane used by walkers, farmer's and the user's of the stables at the house, the occupancy of 8 house's would change dramatically the nature of the area and alter the village. The road to the property on the applicant's land is well know for flooding and access to the property by the emergency services would be highly effected.This road is also single track with no passing place's for vehicles.
