Do you wish your comments to be published on the website anonymously?	Yes
We wish to object based on the following: 1. Disruption to quiet residential area due to increased traffic in and out of the home with shift changes and the day to day running of the home. 2. The specific company who have applied for the planning permission, house children with complex mental health and behavioural issues which require specialised settings which are not matched to this particular dwelling or area. 3. Concerns about safety of much younger children in the area if there is an influx of older children with complex behavioural issues. 4. This company “nurturing children’s services” has only been registered since 2023 and therefore will be very inexperienced in dealing with children with complex needs and will likely lead to problems for the local residents. 5. The owner/ owners of “Nurturing children’s services” are builders/electricians by trade. They have no documented qualification/ experience in child care. We would be concerned that this project is a business opportunity for them rather than it being purely to care for these children. Again the lack of experience would likely lead to problems in the area for local residents.
