

Appendix A – Climate Change Statement

Climate Change Statement for Planning Applications

Part 1: Applicant details

Name of applicant/agent	Nicholas McNaghten
Site Address	11a,11b,11c Woodhead Road, Holmfirth, HD9 2JU & 15,16,17, Lower Mill Lane, Holmfirth, HD9 2JB
Description of Development	Replacement windows and doors in existing building

Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
Proposed new windows & doors are more thermally efficient than the existing windows and doors, saving fuel & power used in the building. New windows and doors will last 20 to 30 years so this will save on cyclical decoration of the repair of the existing timber windows and doors.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Local product sourcing and using local suppliers is always favoured by the building owner.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

Replacement windows and doors have been specified for their longevity and thermal performance
Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)
All works do comply to current building regulations
Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)
The proposal includes for composite doors which due to their construction are better at resisting water ingress than the existing timber doors.
Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)
Due to the limited works no measures have been taken.
Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)
Due to the limited works no measures have been taken.
Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

Due to the limited works no measures have been taken.
