<p>This application will create danger and disruption both during and after the development works.</p> <p>The works will bring noise, disturbance and odour, dust and pollution along with impact on highway safety.</p> <p>Traffic will be significantly increased on what is already an overused road system. The road will become a busy road and will take away the rural public footpaths and will have a negative impact on the nature and wildlife at the site.</p> <p>This will bring dangerous conditions for local family residents such as myself and my children. It will bring disruption and danger to school children walking to the local primary school.</p> <p>Neighbouring properties will be devalued as the rural landscape will be spoiled.</p> <p>There is a significant worry about ground stability also due to possible coal underground which if disturbed could have dangerous impact to surrounding houses and streets.</p> <p>A previous plan was reflected in 2024 for valid reasons. Some of which I have listed in my objection. This should also be taken into account.</p>
