<p>This will cause dust, pollution, and noise. There are already a number of new housing developments being built in Denby Dale. None of these are being done with consideration of the pressure this would put on existing infrastructure which is already stretched. I am concerned the entrance to the proposed development (although just within the small 30mph section at the bottom of Cumberworth Lane) will be a major risk – adding more traffic to an already dangerous road. The planning is not for affordable housing which is what is needed. My worry is that the way that the remediation may be done could be worse for local residents, worse for air quality, worse for water pollution and the wider environmental impact, worse for transport movements, than the proposals regarding the houses themselves.</p>
