<p>I believe that this development is an unnecessary attempted addition to this already full village.</p> <p>The infrastructure is underdeveloped for the existing population.</p> <p>This is particularly pertinent for the road network which is already exceedingly difficult to navigate, especially at peak times. The access roads for any large haulage Lorries especially would be further obstructed, given the overburdened nature that already exists with parked cars along Wakefield Road and Cumberworth lane at all times of the day.</p> <p>We already experience fluctuating water pressure in Denby Dale and combined with the well publicised water pressure issues in Cumberworth, a development of this size can only further deteriorate these issues.</p> <p>The proposed nature of the site 'preparation' would create immense amounts of dust and disruption which would be detrimental for local residents and I personally have concerns for my young children being exposed to the proposed industrial nature of the excavations and the inevitable deterioration in road safety of the increased construction and residential traffic created by it.</p>
