<p>The tree surgeon has worked on the trees and carried out the work according to the permission given and will keep the trees healthy for many years. The trimming of the trees has also made the area lighter on the dark evenings.</p> <p>After looking at the plans this amendment is to the front of the carport only and does not extend to the rear of the parking area so I am not concerned about any of the root protection area as this remains the same. The amendment makes the splayed entrance easier for parking and site view and visibility for pedestrians.</p>
