<p>Dear Sirs.</p> <p>The additional parking will make little or no difference to the current parking situation.</p> <ol style="list-style-type: none">1. I have been informed by a previous member of staff that they are not allowed to use the carpark and are instructed to park on the road. There will therefore always be a number of vehicles on the road.2. The park on the junction despite placing traffic cones to stop this. Therefore no change there.3. Customers will always park on the road regardless of the number of spaces. Check on google earth clearly shows this.4. Statement indicates no external materials to be used is incorrect as thereis already a road been constructed contraveneing the previous application. <p>In general it has been stated that this buisness is a benefit to the local community, all it does is employ a few local people with very little on no benefit to the immediate comunity.</p> <p>Contrary to this are thehundreds of vehicles on a daily basis causing havoc and pollution to the local environment.</p> <p>The fact that the planners allowed the extension to the cafe has exasperated the situation by bringing in more customers.</p> <p>The only solution at this stage would be to place double yellow lines at the junction with Slades Rd. and residents permit parking in the surrounding areas. Thus reducing the attraction of the cafe.</p>
