

## Appendix A – Climate Change Statement

### Climate Change Statement for Planning Applications

#### Part 1: Applicant details

Name of applicant/agent	KINGSMAN HOMES.
Site Address	LAND OFF OF SOUTHWOOD AVE, HAMING HONLEY.
Description of Development	9 DWELLINGS TO LAND OFF OF SOUTHWOOD AVENUE, HAMING, HONLEY.

#### Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:

Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)

THE HOMES WILL HAVE AIR SOURCED HEAT PUMPS.  
AND SOLAR PANELS TO GENERATE POWER OFF GRID.

Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)

- materials will be sourced locally
- use local merchants
- look at materials from renewable sources

Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)

- Heating & power will be off grid solutions i.e. solar & heating.

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations? (See section 5)

- All of the plots are designed to maximise where possible solar gain, roof slopes facing optimum orientation to maximise solar gain/energy

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

Drainage in accordance with flood risk assessment & adopted schemes at planning. Permeable surfaces where possible.

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

- All steps such as, restrictors on taps <sup>and will consider</sup> to current Building Regulations, reducing water losses from water distribution systems, safe wastewater reuse etc.

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

- native hedgerows where possible
- Small tree planting to amenity spaces.
- habitat provision.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

- local materials, clean methods of transport where possible
- dust & protection methods during construction
