<p>Significant on street parking on Southwood Avenue already impacts space to pass/turn around with refuse vehicles sometimes not attending due to obstructions. This will be further impacted by large site access vehicles and for site workers to park their vehicles.</p> <p>In Winter the spring which travels across the entrance to Southwood Avenue often freezes and is not resolved by Council gritting. This issue must be resolved to avoid a dangerous accident occurring.</p> <p>Drainage issues already highlighted for previous applications do not appear to have been adequately resolved with further impact to an already regular flooding issue at the entrance to Gynn Lane.</p> <p>Impact to a small cul-de-sac from significant site traffic and further household vehicles will significantly change the appearance and traffic flow on Southwood Avenue with little passing room already with multiple cars parked on the road.</p>
