<p>Southwood avenue its a narrow road and cars have to be careful when passing each other without the extra hazard of almost doubling the use of this residential road as well as increasing the risk to pedestrians.</p> <p>The access on and off of Southwood avenue to Hall Ings is a blind entrance and the added traffic will contribute to the likelihood of a serious collision between vehicles or involving pedestrians especially as school children use Hall Ings to walk to School.</p> <p>The gradient of the access road will mean that car lights will be shining directly into bedrooms located at the front of the existing properties as the proposed road meets Southwood avenue meaning a total loss of privacy for these properties.</p> <p>The proposed development will have a significant and serious impact on the local wildlife including Owls and bats who currently use the site for feeding, once the site is built it will cause light pollution further disturbing the local wildlife.</p>
