

## CLIMATE CHANGE STATEMENT

---

location	106 Taylor Hill Road, Huddersfield, HD4 6HJ.
application	Erection of First Floor Extension and Alterations to Dwelling.
client/applicant	Mr A Brown.
job number	24/1094.
date	December 2024.

---

Company Registration Number: 09898149 - Company Registered in England and Wales

## Part 1: Applicant details

Name of applicant/agent	Agent – Paul Matthews Architectural Applicant – Mr A Brown
Site Address	106 Taylor Hill Road, Huddersfield, HD4 6HJ.
Description of Development	Erection of First Floor Extension and Alterations to Dwelling.

## Part 2: Climate Change Mitigation measures

Please respond to the following questions considering the measures set out in the Climate Change Guidance note:
Q1: What measures have been/will be taken to reduce the energy demand associated with your proposed development beyond the minimum required in Building Regulations? (See section 2)
The works are subject to a Building Regulations application where compliance will be required. The proposals will provide a more thermally efficient property with the proposed extension being built to a more thermally efficient standard.
Q2: What measures have been/will be taken to limit the carbon consumed through the implementation and construction processes, e.g. by reusing existing on-site materials or sourcing materials locally? (See section 3)
Contractors and materials will be sourced locally, where possible.
Q3: What measures have been/will be taken to utilise renewable or low carbon energy sources? (See section 4)
Materials to be used within the new build (Blockwork, Glass, Concrete and Timber) are wholly recyclable.

Q4: What measures have been/will be taken to ensure the building design and layout has been optimised to energy efficiency beyond the minimum requirements in Part L of the Building Regulations ? (See section 5)

The proposals will present a more energy efficient dwelling for the future as a result of the design encapsulating part of the existing property with a significantly higher thermal efficiency.

Q5: What measures have been/will be taken to reduce potential impacts of flooding associated with your proposed development? (See section 6)

Flood risk does not apply to this application

Q6: What measures have been/will be taken to reduce water stress associated with your proposed development? (e.g. Water retention and minimisation measures) (See sections 7 and 8)

Not applicable on this application.

Q7: What measures have been/will be taken to provide biodiversity net gains? (See section 8)

Not applicable on this application.

Q8: What measures have been/will be taken to reduce air pollution associated with your proposed development? (See section 9)

Not applicable on this application.

## **Appendix B – Further information**

### **Kirklees Local Plan**

The development plan for the Kirklees Council area ([www.kirklees.gov.uk/localplan](http://www.kirklees.gov.uk/localplan))

### **Planning applications guidance and advice notes**

<https://www.kirklees.gov.uk/beta/planning-applications/guidance-and-advice-notes.aspx>

### **Air Quality and Pollution:**

Kirklees Council's website has information on sources of pollution and our Air Quality Management Areas.

<https://www.kirklees.gov.uk/beta/crime-and-safety/air-pollution.aspx>

### **Building Design and Layout:**

The Construction Industry Research Information (CIRIA) publishes guidance on various construction issues, including building and construction technology and sustainability and the built environment.

[www.ciria.org.uk](http://www.ciria.org.uk)

Information on environmentally friendly construction products can be found from the Royal Institute of British Architects product selector website.

[www.ribaproductselector.com](http://www.ribaproductselector.com)

Passivhaus Trust provides guidance for designing for increasing summer temperatures and constructing buildings to a high energy efficient standard using a quality assurance approach.

<https://www.passivhaustrust.org.uk/guidance.php>

### **Construction Materials and Techniques:**

Information on environmentally friendly construction products can be found from the Royal Institute of British Architects product selector website.

[www.ribaproductselector.com](http://www.ribaproductselector.com)

The UK Green Building Council provides information on sustainable building techniques.

<https://www.ukgbc.org/>

The Building Research Establishment (BRE) Environmental profiles website provide information about sustainable design, energy conservation measures and building materials and components.

[www.bre.co.uk](http://www.bre.co.uk)

The Construction Industry Research Information (CIRIA) publishes guidance on various construction issues, including building and construction technology and sustainability and the built environment.

[www.ciria.org.uk](http://www.ciria.org.uk)

Production information on certified timber and timber products is available from the Forest Stewardship Council.
