<p>I would like to object to this.</p> <p>This building already blocks enough light and adds noise and if this is planning is approved, it will dramatically reduce light more, reduce privacy, add even more noise, more traffic, even more traffic noise as well as change the area from being a more quiet little street near greenery, into a more built up area, with lots of houses, traffic and noise.</p> <p>Adding dormer windows too will make the building even taller and block yet more light from houses such as 1,3, 5 and 7.</p> <p>There will be more cars parked up adding to yet more light blocking as well as making this more quiet area into a noisy built up area as well as blocking the view and changing the scenery drastically and reducing privacy.</p> <p>The houses nearby are dark enough inside from the amount of light this building blocks, and adding dormer windows will block more light as well as reduce privacy for the houses nearby.</p> <p>There will be cars parking near to the nearby houses and more people coming and going meaning more traffic and lots more noise.</p> <p>This area is supposed to be a peaceful little street near a green area, but this will change the area dramatically.</p> <p>Think of the nearby houses such as numbers 1, 3, 5, 7 who will be dramatically affected as well as 9, 11 and 11a.</p> <p>The current building is terrible for blocking light and changed the view massively. We had a view of trees and greenery. Now it is partial view.</p> <p>If this new permission gets granted, it will block more light, block more of the view and add a lot more noise and traffic noise as well as add more cars parked up</p>	

add a lot more noise and traffic noise as well as add more cars parked up.  
The area will change dramatically for the worse.

Plus one other thing is that back green road is already in a poor state, and adding yet more traffic from new residents will make this road even worse.

Please think of the nearby houses, the lack of lighting this will bring, the reduction of privacy, the added traffic and traffic noise as well as more noise in general from residents living there and the change of scenery it will bring.

Also, this current building as it currently is was initially illegally converted from a garage, after they had approval to change it into a dwelling refused twice, yet they went ahead with it and made the changes anyway.

It was initially built as a garage and then they applied to change it into a dwelling which was denied twice. Yet they went ahead and changed it into a dwelling anyway after the two denied applications.
