

Biodiversity gain plan

Submit a biodiversity gain plan to show how your development will achieve biodiversity net gain.

When to use this form

A biodiversity gain plan shows how a development will achieve 10% biodiversity net gain (BNG). Submit this form to your local planning authority after they approve your planning application.

Unless your development is exempt, you cannot start the development until the LPA approves your biodiversity gain plan and biodiversity metric calculation tool.

4. Biodiversity net gain strategy

4.1 Is the relevant date for the pre-development biodiversity value the same date as the planning application?

☒ Yes

☐ No

4.2 If no, what earlier date did you agree with the LPA?

4.3 How have you met 'what counts towards your BNG'?

[Find out what you can count towards a development's BNG](#)

I am not using the habitat creation, enhancement, or offsite purchases in any other scheme

4.4 How will you avoid or minimise impacts to habitats?

Tell us about the steps you've taken on-site, including to avoid or minimise the impact on irreplaceable habitats.

The site is an active Farm and as such difficult to achieve +10% BNG within the site, however there will be a fairly shallow banking between this existing building (and extension as per planning application) and a further building below. This will afford an excellent location for the planting of 20-25 trees as this will stabilise the soil and provide shelter for the building

4.5 Did you use your local nature recovery strategy to inform the strategic significance of habitats?

This includes other specified strategies if you do not have a local nature recovery strategy.

☐ Yes

☒ No

4.6 How will you achieve the target net gain percentage?

- ☒ On-site
- ☐ Off-site
- ☐ Both-site

4.7 Are any of your on-site enhancements considered 'significant'?

[Find out what counts as a significant on-site enhancement.](#)

- ☒ Yes

4.8 If yes, tell us about the significant on-site enhancements

Include the appropriate planning condition or how you've secured the habitat.

As part of the planning application, probably via a condition to be agreed with the LA

4.9 If no, how many off-site biodiversity units do you need to meet 10% net gain?
