

ELITE TRANSPORT

ROAD HAULAGE SOLUTIONS

Operations Management Plan.

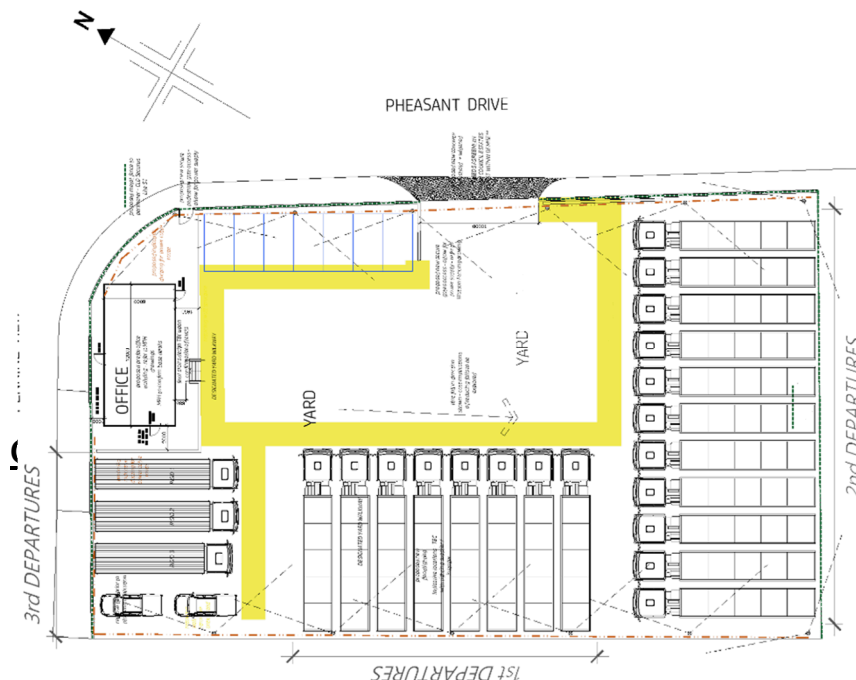

Overview of Business:

Jack Rawson Haulage Ltd T/A Elite Transport has been operating a haulage company for 26 Years. Our Vehicles/ drivers are Trampers, which means they have overnight cabs & facilities and stay across the UK/ Scotland/ Wales throughout the week using services/ Truck stops and customers depots.

Vehicles do not return on the Same day/ same time. Vehicles depart & return between Monday to Saturday Morning on planned routes, managed by the Transport Management Team- John Rawson (Director) & Ian Egan (Operations Manager). Our depot is open Monday- Friday (8am- 6pm) Saturday (until 1pm). Max vehicles returning at any one time is 1. All vehicles are tracked and monitored by an in-house tracking system- Webfleet, which provides an exact location of the vehicles & trailers at any time. Both John (Director) & Ian Egan (Operations Manager) monitor this system to manage vehicles throughout the daily operation.

Transport Planning:

Our Bays are managed in 3 sections dependent on departure time of that Vehicle/ Load. (Please Refer to diagram supplied). This is Managed precisely by our Transport planning team. Vehicles departing Early Monday AM will be parked in the 1st departures bay, 2nd departure bay will then be managed from Right to Left and finally 3rd departure bay will depart last. All drivers know their Monday departure times in advance of arrival back to work, both John Rawson (Director) & Ian Egan (Operations Manager) are on site to assist. In their absence it becomes the responsibility of Kendell Stanley (General Manager)

We have another Site on our O License for Trailer Storage (as current business operation/ model) which prevents any overspill. Please revert to O license checks.

Future House, Pheasant drive, WF17 9LT has been approved with an O license.

CPC License Holder:

John Rawson (Director)
