<p>I have concerns regarding:</p> <p>the impact of the proposal on the already busy congested road in this area the aesthetic effect on the building and surrounding graveyard there is likely to be noise pollution from these dwellings for those visiting their deceased loved ones in the graveyard it is inevitable that the building works will cause disruption to the graveyard I see no assurances that memorial stones near to the Church entrance will not be removed, disturbed or damaged there is nothing in the application to show that the families of those buried in the graveyard or those with memorial stones will be contacted if any stones are to be moved or are damaged.</p> <p>The application is blase and totally inconsiderate to the feelings and concerns of those with deceased loved ones interred here. I am one of those relatives and I am appalled at how this is being conducted.</p>
