Subject: RE: 5 Cumberworth Road - 2025/62/90526 - Updated drawings and comments

It appears that the permission to remove the tree was granted after my original consultation. The tree has been granted removal due to it being made unsafe because of an excavator being used within the rooting zone. The council had no other option to grant the removal for safety reasons. Due to this being a protected tree within a conservation area I would expect to see mitigation planting for the loss of these trees.

There is no longer the need for an Arboricultural impact assessment but there is now need for a landscaping plan showing the mitigation planting.

Kind regards
