<p>I wish to object against this planning application on several grounds</p> <p>1 effect on trees and the landscape As a resident of Victoria street for 39 years I always thought that the trees that that run along the boundary wall where protected under the Tree Preservation Order (TPO) and as I understand this application requires the removal of some of the said trees so I object.</p> <p>2 impact on highway safety and traffic The plan shows the development of three dwellings each with a two car driveway so six cars in total all of which will need to gain access to Victoria street .So how can this be done safely given how close to the junction of Victoria street and chapel hill traffic turning left from chapel hill onto Victoria street will encounter a blind spot and we all know that it wont be long until there's a accident this also is the reasons for my Objection to the planning application at 54 Victoria street. Clayton West 2025/62/90657/E</p>
