My principal objection to this planning application is that the increased traffic exiting hall lane at the junction of church lane will increase the likelihood of a serious accident on an already dangerous blind and tight corner, where at regular times and especially at the peak rush hour periods heavy goods vehicles and buses meet with very little room for error and considering there is also a pedestrian footpath which opens out onto the road which has no safety barrier at the roadside edge, I think it will increase the likelihood of fatalities on an already dangerous junction.
