good afternoon

I hope this email finds you well, I have completed the online form to raise an objection about 2025/90930, however as I needed to object anonymously, and being restricted to 500 characters, I noted that if it needs to be over 500 characters, to send an email to DC.

So as previously discussed via email, the issue is potential altercations with the proposer, as if I went into full detail, they would know , and would cause issues.

The application states the noise impact would be to back lane, but has not taken into consideration which is actually closer than those on back lane, and also , where as back lane there is no direct contact with . so in simple terms, how would you or any person feel about having a roof top micro brewery beer garden over ..... and then leads to another issue of background music till 11pm and not being able to enjoy . there is yet another issue of littering, as in throwing object such as glasses, bottles, cigarette end to name but a few.

Impact to wildlife, in the last month we have seen wrens, goldfinches, nest and roost with successful breeding (photo evidence of goldfinches. in the last 2 years we have seen little owls, and gos hawk (we think, photo evidence) to the rear of the proposed siting. It is also near impossible to get pictures of the bats flying through from ..... as they use this like a flight path.

Materials, as I have highlighted in my comments, the building north of the site, is all wooden window frames and had to replace with such, and a stone roof. , also had years to battle planning, to allow to change windows, and it was insisted they had to be wood

within a conservation area, and again a stone slate roof. So how can it be passed or allowed for the type of roof and windows proposed.....directly the roof material and windows.

Bamforths mill itself has, to a point been renovated on the exterior, but nothing has been done with the inside for almost a decade! (exterior works still ongoing) with no Tennant/s or business internally its a shell/storage facility if nothing else for the proposer..... it has a blue plaque status so something further should be done with it, so rather than building something, why not use something that is already there? and it wont impact neighbours, wildlife, and other factors.

kind regards

(annonymous)
