With reference to objection to the above planning permission for 64 Westfield lane.
After taking down the trees and effecting the birds and wildlife in the area this has caused major disruption to their nesting locations
The site has now had two dwelling arrected on it , one being a caravan and the second an office. It also has Bright tall site Lights that have been arrected , and have bright lights on at night causing light pollution. There are also cameras on the site with a tannoy announcing day and night when something has been detected or moving causing noise pollution. There is also loud shouting and lots of swearing going off in loud conversation from the site through the day and early evening, again causing noise pollution and upsetting the local residents
Its clear he is running a business from the site because of all the vehicles on the site and others attending plus also there are HGV waggons attending at all times of day and blocking off the drives of the surrounding properties
This is because the owner of the site has put his own van and cars on the road at either side of his drive
This is causing a hazard both to cars and pedestrians and it is close to the entrance of the foot path leading to the entrance of the primary school again causing obstruction to cars and pedestrians and the highway.
We would strongly suggest that the site should be reinspected by the planning department before a decision is made, as what is shown on paper does not look to be what is happening at the site. The very large gates and high fencing is industrial and unsightly and is not in keeping with the surrounding area
