Town and Country Planning Act 1990

Town and Country Planning (Development Management Procedure) (England) Order 2015

PLANNING PERMISSION FOR DEVELOPMENT

Application Number: 2025/62/90949/W

To: Ed Jagger,
Shaw & Jagger Architects Ltd
1, Cardale Park
Beckwith Head Road
Harrogate
HG3 1RY

For: T CROMPTON

In pursuance of its powers under the above-mentioned Act and Order the KIRKLEES COUNCIL (hereinafter called "The Council") as Local Planning Authority hereby permits:-

ERECTION OF DETACHED DWELLING WITH DETACHED GARAGE AND ASSOCIATED LANDSCAPING

At: WHINNEY CLOSE FARM, 106, COCKLEY HILL LANE, KIRKHEATON, HUDDERSFIELD, HD5 0PF

In accordance with the plan(s) and applications submitted to the Council on 14-May-2025, subject to the condition(s) specified hereunder:-

1. The development hereby permitted shall be begun within three years of the date of this permission.
Reason: Pursuant to the requirements of Section 91 of the Town and Country Planning Act 1990 (as amended).

2. The development hereby permitted shall be carried out in complete accordance with the plans and specifications schedule listed in this decision notice, except as may be specified in the conditions attached to this permission, which shall in all cases take precedence.
Reason: For the avoidance of doubt as to what is being permitted and so as to ensure the satisfactory appearance of the development on completion, and to accord with Policies LP7, LP21, LP22, LP24, LP28, LP30 and LP33 of the Kirklees Local Plan, the adopted Housebuilders SPD and Chapters 2, 5, 8, 9, 11, 12, 14 and 15 of the National Planning Policy Framework.

3. Notwithstanding the submitted details, development above slab/foundation level shall not commence until details of all external walling and roofing materials to be used on the approved dwelling and garage have been submitted to and approved in writing by the Local Planning Authority. The development shall not be brought into use until the approved scheme has been completed. No materials other than those approved in accordance with this condition shall be used which shall thereafter be retained and maintained for the lifetime of the development.
Reason: In the interests of visual amenity and to protect the green belt setting to accord with Policy LP 24 of the Kirklees Local Plan, The Kirklees Housebuilders Design Guide SPD and guidance contained within Chapter 12 and Chapter 16 of the National Planning Policy Framework.

4. The dwelling hereby approved shall not be occupied until all areas indicated to be private drives on Drawing No. (02)106, received 03/04/2025, are laid out with a hardened and drained surface in accordance with the Communities and Local Government; and Environment Agency's 'Guidance on the permeable surfacing of front gardens (parking areas)' published 13th May 2009 as amended or any successor guidance. Notwithstanding the provisions of the Town and Country Planning (General Permitted Development) (England) Order 2015 as amended (or any Order revoking or re-enacting that Order) these areas shall be so retained, free of obstructions and available for parking thereafter.
Reason: In the interests of visual amenity and traffic safety, to mitigate flood risk arising from surface water run-off, to ensure adequate space within the site for vehicle movements and parking and to comply with Policies LP24 and LP28 of the Kirklees Local Plan and Chapters 9 and 12 of National Planning Policy Framework.

5. Groundworks (other than those required for a site investigation report) shall not commence until a Phase II Intrusive Site Investigation Report by a suitably competent person has been submitted to and approved in writing by the Local Planning Authority.
Reason: This is a pre-commencement condition to ensure that ground conditions have been investigated at an appropriate time, in order to ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework

6. Where site remediation is recommended in the Phase II Intrusive Site Investigation Report approved pursuant to condition (5) further groundworks shall not commence until a Remediation Strategy by a suitably competent person has been submitted to and approved in writing by the Local Planning Authority. The Remediation Strategy shall include a timetable for the implementation and completion of the approved remediation measures.
Reason: This is a pre-commencement condition to ensure that adequate remediation measures have been investigated at an appropriate time, in order to ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework

7. Remediation of the site shall be carried out and completed in accordance with the Remediation Strategy approved pursuant to condition (6). In the event that remediation is unable to proceed in accordance with the approved Remediation Strategy or contamination not previously considered in either the Preliminary Risk Assessment or the Phase II Intrusive Site Investigation Report is identified or encountered on site, all groundworks in the affected area (except for site investigation works) shall cease immediately and the Local Planning Authority shall be notified in writing within 2 working days. Works shall not recommence until proposed revisions to the Remediation Strategy have been submitted to and approved in writing by the Local Planning Authority. Remediation of the site shall thereafter be carried out in accordance with the approved revised Remediation Strategy.
Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework.

8. Following completion of any measures identified in the approved Remediation Strategy or any approved revised Remediation Strategy a Verification Report by a suitably competent person shall be submitted to the Local Planning Authority. No part of the site shall be brought into use until such time as the remediation measures have been completed for (that part of) the site in accordance with the approved Remediation Strategy or the approved revised Remediation Strategy and a Verification Report in respect of those remediation measures has been approved in writing by the Local Planning Authority. Where verification has been submitted and approved in stages for different areas of the whole site, a Final Verification Summary Report shall be submitted to and approved in writing by the Local Planning Authority.
Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework.

9. No above ground development shall commence until (excluding demolition of existing structures and site clearance);

a) a scheme of intrusive investigations has been carried out on site to establish the risks posed to the development by past shallow coal mining activity; and
b) any remediation works and/or mitigation measures to address land instability arising from coal mining legacy, as may be necessary, have been implemented on site in full in order to ensure that the site is made safe and stable for the development proposed.

The intrusive site investigations and remedial works shall be carried out in accordance with authoritative UK guidance.
Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework.

10. Prior to the occupation of the development, or it being taken into beneficial use, a signed statement or declaration prepared by a suitably competent person confirming that the site is, or has been made, safe and stable for the approved development shall be submitted to the Local Planning Authority for approval in writing. This document shall confirm the methods and findings of the intrusive site investigations and the completion of any remedial works and/or mitigation necessary to address the risks posed by past coal mining activity.
Reason: To ensure the safe occupation of the site in accordance with Policy LP53 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework.

11. Prior to the first occupation of the dwelling hereby approved, one integrated bird nesting feature shall be installed within the fabric of the building. The nesting features shall be retained thereafter.
Reason: To enhance opportunities for biodiversity at the site and to accord with Policy LP30 of the Kirklees Local Plan, guidance contained within Chapter 15 of the National Planning Policy Framework, and Principle 9 of the Housebuilders Design Guide SPD.

12. No works shall take place until a Construction Environmental Management Plan (CEMP: Biodiversity) has been submitted to and approved in writing by the local planning authority. The CEMP (Biodiversity) shall include the following:

a) Summary of potentially damaging activities
b) Identification of "biodiversity protection zones"
c) Practical measures (both physical measures and sensitive working practices) to avoid or reduce impacts during construction (these may be provided as a set of method statements)
d) The location and timing of sensitive works to avoid harm to biodiversity features.
e) The times during construction when specialist ecologists need to be present on site to oversee works.
f) Responsible persons and lines of communication.
g) The role and responsibilities on site of an ecological clerk of works (ECoW) or similarly competent person.
h) Use of protective fences, exclusion barriers and warning signs.
i) The approved CEMP: Biodiversity shall be adhered to and implemented throughout the construction period strictly in accordance with the approved details, unless otherwise agreed in writing by the local planning authority.

The CEMP must also include the following specific plans / documents:

- Bats - Reasonable Avoidance Measures Method Statement
- GCN - Reasonable Avoidance Measures Method Statement, including an ECoW plan
- For reptiles, hedgehogs, birds, and badgers - Protected Species Method Statement

Reason: This is a pre-commencement condition to ensure the protection of biodiversity during the development process, in the interests of biodiversity and in accordance with Policy LP30 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework.

13. Prior to development commencing protective fencing in accordance with British Standard BS 5837 shall be erected around all protected trees and trees to be retained on the site.
Reason: This is a pre-commencement condition in order to protect visual amenity and the long term viability of the trees and to accord with policy LP30 of the Kirklees Local Plan.

14. Prior to the installation of any external lighting, a detailed lighting scheme, developed in accordance with established guidance (e.g. Bat Conservation Trust and Institute of Lighting Professionals (2023) Bats and Artificial Lighting at Night), shall be submitted to, and approved in writing by, the Local Planning Authority. The Sensitive Lighting Strategy will demonstrate that the lighting will not impact upon ecological networks and/or sensitive features. External lighting shall be installed in accordance with the specifications and locations set out within the approved lighting scheme and retained thereafter.
Reason: In the interests of biodiversity and in accordance with Policy LP30 of the Kirklees Local Plan and guidance contained within Chapter 15 of the National Planning Policy Framework 2024.

15. The development shall not be brought into use until a scheme detailing hard and soft landscaping, tree/shrub planting, including the indication of all existing trees and hedgerows on and adjoining the site, details of any to be retained has been submitted to and approved in writing by the Local Planning Authority. The scheme shall incorporate the planting of native trees and hedgerows. The scheme shall detail the phasing of the landscaping and planting. The development and the works comprising the approved scheme shall be implemented in accordance with the approved phasing. The approved landscaping scheme shall, from its completion, be maintained for a period of five years. If, within this period, any tree, shrub or hedge shall die, become diseased or be removed, it shall be replaced with others of similar size and species unless the Local Planning Authority gives its written consent to any variation. The areas indicated for use as soft landscaping shall be retained as soft landscaped areas for the lifetime of the development and used for no other purpose.
Reason: To ensure that there is a well laid out scheme of healthy trees, hedgerows and shrubs in the interests of amenity, providing biodiversity measures and mitigating impact upon openness of the Green Belt to accord with Policies LP24 and LP30 of the Kirklees Local Plan, principles 7 & 9 of the Housebuilders Design Guide, and policies within chapters 12, 13 and 15 of the National Planning Policy Framework.

16. Within 3 months from the date of this permission, the proposed stone wall along the permitter of the site will be lowered to 1m in height as shown on drawing ref: (02)106 REV A, received 08/07/2025. The wall shall be retained as such for the lifetime of the development.
Reason: In the interests of visual amenity and to protect the green belt setting to accord with Policy LP 24 of the Kirklees Local Plan, and guidance contained within Chapter 12 and Chapter 16 of the National Planning Policy Framework.

17. Notwithstanding the provisions of The Town and Country Planning (General Permitted Development) Order 2015 (as amended) (or any Order revoking or re-enacting that Order) no development included within class(es) A, AA, B, C, E and F of part 1 of Schedule 2 to that Order shall be carried out without the prior written consent of the Local Planning Authority.
Reason: In the interests of the openness of the Green Belt and Visual Amenity, in accordance with Policy LP24 of the Kirklees Local Plan and guidance contained within Chapter 13 of the National Planning Policy Framework.

NOTE: All contamination reports shall be prepared by a suitably competent person, as defined in Annex 2 of the National Planning Policy Framework. Reports must be prepared in accordance with the following guidance:

- *Land Contamination Risk Management (LCRM)*
- BS 10175:2011+ A2:2017 *Investigation of Potentially Contaminated Sites. Code of Practice*
- *Development on Land Affected by Contamination - Technical Guidance for Developers, Landowners & Consultants - (v11.2) June 2020* by the Yorkshire and Lincolnshire Pollution Advisory Group.

The conditions relate to Planning Control only. Approval under the Building Regulations may also be required, and the applicant should contact their Building Control Provider for further information. Any other necessary consent must be obtained from the appropriate authority. If the applicant commences work without discharging conditions, they will be at risk of enforcement action and invalidating the permission if the planning condition is a pre commencement condition.

NOTE: Ground Investigations

Under the Coal Industry Act 1994 any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) require the prior written permission of the Coal Authority since these activities can have serious public health and safety implications. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Failure to obtain permission to enter or disturb our property will result in the potential for court action. Application forms for Coal Authority permission and further guidance can be obtained from The Coal Authority's website at: www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property

NOTE: Shallow coal seams

In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

NOTE: Requirement for Incidental Coal Agreements

If any future development has the potential to encounter coal seams which require excavating, for example excavation of building foundations, service trenches, development platforms, earthworks, non-coal mineral operations, an Incidental Coal Agreement will be required from the Coal Authority. Further information regarding Incidental Coal Agreements can be found here - https://www.gov.uk/government/publications/incidental-coal-agreement/guidance-notes-for-applicants-for-incidental-coal-agreements

NOTE: No construction related noise shall be audible beyond the site boundary outside the hours of:

- 07.30 to 18.30 hours Mondays to Fridays
- 08.00 to 13.00 hours Saturdays

With no construction related noise audible beyond the site boundary on Sundays or Bank/Public Holidays.
Kirklees Council has powers under Section 60 of the Control of Pollution Act 1974 to control noise from construction sites and may serve a notice imposing requirements on the way in which construction works are to be carried out. It has additional powers under Sections 80 of the Environmental Protection Act 1990 to prevent statutory nuisance including noise, dust, smoke and artificial light and must serve an abatement notice when it is satisfied that a statutory nuisance exists or is likely to occur or recur. Failure to comply with a notice served using the above-mentioned legislation would be an offence for which the maximum fine on summary conviction is unlimited

NOTE: We note that parking is proposed at this development. We would encourage any electric vehicle charging points installed as part of this development to meet the requirements of the *Air Quality & Emissions Technical Planning Guidance* from the West Yorkshire Low Emissions Strategy Group. The applicant should note the information in the recommended Electric Vehicle Charging Points Footnote.
The electrical supply of the final installation should allow the charging equipment to operate at full rated capacity and the installation must comply with all applicable electrical requirements in force at the time of installation.
Approval of EVCPs under the Building Regulations may also be required, and the applicant should contact their Building Control Provider for further information in relation to Approved Document S.

NOTE: The applicant is reminded that if any evidence of bats, nesting birds, or other protected species is found during the course of works, all activity must cease immediately, and advice should be sough from a suitably qualified ecologist. It is an offence under the Wildlife and Countryside Act 1981 (as amended) and the Conservation of Habitats and Species Regulations 2017 to disturb or harm protected species or their habitats. Failure to comply with the legislation could result in prosecution.

NOTE: The granting of planning permission does not authorise the carrying out of works within the highway and the changes to the access within the adopted highway fronting the property will need to be constructed under a section 184 agreement of the 1980 Highways Act (vehicle crossings over footways and verges). You are required to consult the Design Engineer (Kirklees Street Scene: 01484 221000) with regard to obtaining this permission and approval of the construction specification. Interference with the highway without such permission is an offence which could lead to prosecution.

NOTE: Public footpath KIR/9/30 should remain free and available to be used prior to, during or after development works. The Council's public rights of way unit may be contacted by telephone 01484 221000 and ask for Sharon Huddleston or via the email address publicrightsofway@kirklees.gov.uk

Coal Mining Risk Assessment Report	C3678/23/E/5584		03/04/2025
Coal Mining Risk Assessment			03/04/2025

Pursuant to article 35 (2) of the Town and Country Planning (Development Management Procedure) Order 2015 and guidance in the National Planning Policy Framework, the Local Authority have, where possible, made a pre-application advice service available, complied with the Kirklees Development Management Charter 2024 and otherwise actively engaged with the applicant in dealing with the application. A revised block plan was submitted which reduced the height of the stone wall along the permitted of the site to protect visual amenity of the green belt setting.

Building Regulations Approval is required for most work involving building operations and/or structural alterations. It is the applicant's responsibility to find out if the work permitted by this planning permission needs approval under the Building Regulations, and if necessary to submit an application. If you are not the applicant can you please ensure the applicant is aware of this requirement. Contact Building Control on Tel No: (01484) 221550 for more information.

It is the applicant's responsibility to find out whether any works approved by this planning permission, which involve excavating or working near public highway and any highway structures including retaining walls, will require written approval from the Council's Highways Structures Section. Please contact the Highways Structures Section on Tel No. 01484-221000 Ext 74199 for further advice on this matter.

Details Reserved by Condition

- **This permission has been granted subject to conditions. Some of the conditions may require you to submit further details. These conditions normally contain the wording "*submitted to and approved in writing by the Local Planning Authority*".**

- **You can apply online for approval of these details at the Planning Portals website at www.planningportal.gov.uk. Alternatively the forms and supporting guidance for submitting an application can be found online at www.kirklees.gov.uk/planning.**

- **This Authority recognises the need to ensure that you are able to develop the site as effectively and flexibly as possible. However, at the same time it must ensure that development is in accordance with the terms of the planning conditions and legal agreement and the expectations of elected members and local residents set through the decision process.**

- **You should note the triggers for compliance with the conditions of this planning permission. This Authority is committed to processing applications to discharge conditions in a timely manner. It is important to ensure that submissions are made as far in advance of the trigger to allow time for adequate consultation, discussion and in some circumstances publicity.**

- **It is important that applications to discharge conditions are accompanied by sufficient information to enable this Authority and its consultees to fully consider and determine the proposals. Whilst officers will endeavour to negotiate solutions, failure to provide a comprehensive submission may result in delay and refusal of the application.**

- **If you commence work without discharging conditions you are at risk of enforcement action and invalidating your permission if the planning condition is a pre commencement condition.**

Development within a Coal Mining Area

The proposed development lies within an area that has been defined by the Mining Remediation Authority as containing coal mining features at surface or shallow depth. These features may include: mine entries (shafts and adits); shallow coal workings; geological features (fissures and break lines); mine gas and former surface mining sites. Although such features are seldom readily visible, they can often be present and problems can occur, particularly as a result of new development taking place.

Any form of development over or within the influencing distance of a mine entry can be dangerous and raises significant land stability and public safety risks. As a general precautionary principle, the Mining Remediation Authority considers that the building over or within the influencing distance of a mine entry should be avoided. In exceptional circumstance where this is unavoidable, expert advice must be sought to ensure a suitable engineering design which takes account of all relevant safety and environmental risk factors, including mine gas and mine-water. Your attention is drawn to the Mining Remediation Authority Policy in relation to new development and mine entries available at:
Building on or within the influencing distance of mine entries - GOV.UK

Any intrusive activities which disturb or enter any coal seams, coal mine workings or coal mine entries (shafts and adits) requires a Mining Remediation Authority Permit. Such activities could include site investigation boreholes, excavations for foundations, piling activities, other ground works and any subsequent treatment of coal mine workings and coal mine entries for ground stability purposes. Application forms for Mining Remediation Authority permission and further guidance can be obtained from The Mining Remediation Authority's website at: http://www.gov.uk/get-a-permit-to-deal-with-a-coal-mine-on-your-property
What is a permit and how to get one? - GOV.UK (www.gov.uk)

In areas where shallow coal seams are present caution should be taken when carrying out any on site burning or heat focused activities.

If any future development has the potential to encounter coal seams which require excavating, for example excavation of building foundations, service trenches, development platforms, earthworks, non-coal mineral operations, an Incidental Coal Agreement will be required. Further information regarding Incidental Coal Agreements can be found here -
https://www.gov.uk/government/publications/incidental-coal-agreement/guidance-notes-for-applicants-for-incidental-coal-agreements

If any coal mining features are unexpectedly encountered during development, this should be reported immediately to the Mining Remediation Authority on 0800 288 4242. Further information is available on the Mining Remediation Authority website at: Mining Remediation Authority - GOV.UK

Digital Infrastructure: Fibre To The Property (FTTP)

Access to affordable and reliable broadband is necessary for Kirklees' residents, businesses, and visitors to take advantage of the growing digital economy and 'digital by default' services. Fibre optic cables direct to a property (FTTP) is the most reliable way of delivering high speed broadband connectivity and allows for gigabit internet speeds. Access to high quality digital infrastructure provides the foundations for, amongst other things:

- Economic prosperity – workforces that are digitally-literate enables business to thrive.
- Digital literacy – digital literacy and skills increase employability and people can exploit the internet for transactional, social, entertainment and learning purposes.
- New services – digital delivery can lower costs and provide innovative public and health services more conveniently.

It is therefore advised that digital infrastructure, including FTTP, and its benefits for the development be considered from the earliest feasible stage. Methods include working with Internet Service Providers to install digital infrastructure alongside other utilities or providing pre-infrastructure allowing for speeder installation at a later date.

Note: The provision of fibre infrastructure is often available from certain telecommunications providers free of charge for development over a certain scale, provided that sufficient notice is given. Notice periods are typically at least 12 months prior to first occupation. In some cases, providers may request a contribution from the developer.

Note: Where no telecommunications provider has been secured to provide fibre infrastructure by the time of highway construction, it is advised that additional dedicated telecommunications ducting is incorporated alongside other utilities to enable the efficient and cost effective provision of fibre infrastructure in the future.

Where the application has been publicised by notice(s) in the vicinity of the site. It is respectfully requested that the notice(s) now be removed and responsibly disposed of to avoid harm to the appearance of the area

Appeals to the Secretary of State

- **If you are aggrieved by the decision of your Local Planning Authority to grant it subject to conditions, then you can appeal to the Secretary of State under section 78 of the Town and Country Planning Act 1990.**
- **If an enforcement notice is served relating to the same or substantially the same land and development as in your application and if you want to appeal against your Local Planning Authority's decision on your application, then you must do so within:**

  i) 28 days of the date of service of the enforcement notice, or
  ii) within the specified period, starting on the date of this notice,

  whichever period expires earlier.

- **If you want to appeal against your Local Planning Authority's decision then you must do so within the specified period, starting on the date of this notice.**

- **The "specified period" is 12 weeks where the development relates to a "minor commercial application" as defined within the Town and Country Planning (Development Management Procedure) Order 2010 (as amended), or 6 months in any other case.**

- **Appeals must be made using a form which you can get from the Secretary of State at Temple Quay House, 2 The Square, Temple Quay, Bristol BS1 6PN (Tel: 0303 444 5000) or online at https://www.gov.uk/appeal-planning-decision. Further information on the Planning Appeal process can be found online at the Planning Inspectorates website https://www.gov.uk/government/organisations/planning-inspectorate.**
- **You must use the correct Planning Appeal Form when making your appeal. If requesting forms from the Planning Inspectorate, please state the type of application that the appeal relates to so they can send you the appeal form you require.**
- **The Secretary of State can allow a longer period for giving notice of an appeal, but he will not normally be prepared to use this power unless there are special circumstances which excuse the delay in giving notice of appeal.**
- **The Secretary of State need not consider an appeal if it seems to him that the Local Planning Authority could not have granted planning permission for the proposed development or could not have granted it without the conditions they imposed, having regard to the statutory requirements, to the provisions of any development order and to any directions given under a development order.**
- **In practice, the Secretary of State does not refuse to consider appeals solely because the Local Planning Authority based their decision on a direction given by him.**

Please note, only the applicant possesses the right of appeal.

Purchase Notices

- **If either the Local Planning Authority or the Secretary of State refuses permission to develop land or grants it subject to conditions, the owner may claim that he can neither put the land to a reasonably beneficial use in its existing state nor render the land capable of a reasonably beneficial use by the carrying out of any development which has been or would be permitted.**

In these circumstances, the owner may serve a purchase notice on the Council. This notice will require the Council to purchase his interest in the land in accordance with the provisions of Part VI of the Town and Country Planning Act 1990.

An important part of improving our service is to review your feedback on the way that we have dealt with your planning application(s). Please take a couple of minutes to email your comments to dc.admin@kirklees.gov.uk so that we can work on continually improving our customer service. Thank you.
