<p>I think the improvements to the clubhouse look ok and have no objection to them. However, there needs to be serious consideration given to the volume of traffic and car parking in the Memorial Grounds. The existing parking provision is massively inadequate at peak times due to the number of park users. Increasing capacity and size of the clubhouse means more users are likely to visit. The access road is one way meaning vehicles back-up onto the road or are unable to pass for a distance of approx 50 meters. Due to this, vehicles already drive quickly down this road which passes across the access gap between the 2 clubs and the entrance to Mirfield CC. This presents a danger, particularly to children playing in the area. The football field is used as an overflow car park. This is now more regularly used for football meaning the access gate is often blocked and parking provisions are significantly reduced. The overspill of parked cars onto Huddersfield road significantly impedes visibility from the Memorial ground gate for access and egress presenting a danger or pushes cars onto Hurst Lane which already generates complaints. I believe that before any expansion and increase in usage and associated traffic to any part of the park the logistics and infrastructure of the entire grounds need a thorough review and overhaul.</p>
