<p>Having only just learnt of the planning application for the dormer it is a little late to put together an in-depth objection</p> <p>Firstly the proposed two storey extension with additional side facing Juliet balcony will look towards my house invading my privacy making me feel like living in a goldfish bowl</p> <p>Blocking out the sunlight and causing a lack of view this will take up floor space making less space to park the numerous cars that are parked in the yard</p> <p>A proposal of a garage again taking up space where the cars are now parked making the terrace more congested for parking</p> <p>There is also concern for the amount of traffic it will create when construction takes place causing extra environmental impact and stress to myself and the other residents trying to access the terrace</p> <p>Also importantly there is a inspection drain on the site which needs access from Yorkshire water when we experience problems wit the drains which I hope is not going to be covered over causing further distress to the residents</p> <p>I would therefore like a visit to the site before considering the proposed plans</p>
