<p>Many of the original objections to this development highlighted the lack of detail respect how the criteria of a sensible, practical and considerate discharge of foul, surface water and land drainage would be acheived. Those objections were never adequately addressed throughout the planning process. Indeed those original objections highlighted the already problematic situation of managing, in particular foul water in the village of Shepley. This application meets non of the above criteria. Not least, foul water pumping stations so close to traditional stone walls whom founadtions will be questionable and neighbouring gardens, where children play? I strongly object to this application.</p>
