<p>The application lacks detail of where the Electrical connection cabinet is going to be situated to enable the waste water pump to function.</p> <p>Marsh Lane is on a 3 phase system of electricity, fed from a pole mounted transformer that encounters regular power cuts. What is the contingency plan for a power cut?</p> <p>Who will maintain all this?</p> <p>Also the bottom north boundary of this land (plot 8) is often sat in surface water throughout the winter months. Hopefully the soakaways have the capacity for this excess water.</p>
