Demolition Notes

Note: drawings to be read in conjunction with all the relevant packages.

- Existing Plans
- Existing Elevations
- Heritage Scoping Plans
- Refurbishment Strategy Drawings
- LBC Details

Demolition works generally:

Extent of demolition subject to further review and clarification on site during Stage 4 technical design.

Elements shown in red dashed lines are to be demolished. All demolished materials and associated elements are to be taken down / removed from site completely (where applicable) and interfaces to be made good to match the existing.

All elements of existing Block B & C to be demolished and removed from site, unless noted otherwise. Demolition works to elements in block A to be carried out with care due to the Grade 2* listing status.

Existing John William Street facade to be recorded, documented, carefully deconstructed and reconstructed. Deconstruction proposals to be submitted by specialist sub-contractor.

Where possible, cornicing, skirtings and other ornate details are to be retained and repaired. Where not possible, due to the proposed layouts, these are to be removed and replaced with new to match existing.

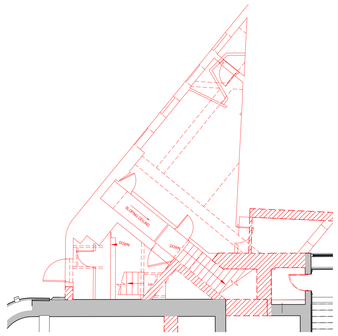

Allow for careful removal of any remaining existing doors. Where decorative frames are to be retained & installed with a new door, frame to be made good following removal of existing door & repaired / refurbished prior to the installation of new doors.

The following hierarchy of repair is to be applied to all existing plaster work on walls that are proposed to be retained:**Whole skims as required** - Gypsum Multiskim. ***Light cracking*** - local scabble, skrim and gypsum.***Deep crack and former elec chases*** – remove all gypsum, infill to 45mm with lime plaster, skrim and Gypsum Multiskim.

Existing floor finishes to be removed from all areas of the building.
